Art Unit: 1742

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 3-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Kankawa et al.

Kankawa et al. disclose a method for forming a sintered part comprising :

providing a powder mixture comprising a metal powder and a binder (col. 9, lines 27-30);

forming a green body (39-40);

removing the binder from the green body under a controlled atmosphere (col. 10, lines 38-40); and

sintering the debound green body to form a sintered part (col. 10, lines 45-51).

Kankawa et al. further disclose wherein the metal powder is selected from a group comprising steel powder (col. 9, line 48).

Kankawa et al. further disclose wherein the binder includes gelatin (col. 8, line 41).

Kankawa et al. further disclose debinding and sintering temperatures within Applicant's range (col. 10, line 44 and col. 10, line 51).

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 1742

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kankawa et al.

Kankawa et al. disclose the invention substantially as claimed (see paragraph 2 above).

However, Kankawa et al. do not disclose adding graphite to the powder mixture.

Kankawa et al. do disclose that his powder mixture can contain alloys.

It is common knowledge in the prior art add graphite to steel powders to be sintered in the same field of invention for the purpose of increasing the alloy hardness of the formed part.

It would have been obvious to one having ordinary skill in the art at the time of the invention to add graphite to the invention of Kankawa et al. in order to increase the hardness of the formed sintered part.
